Level 1 - age 6 months - 12 months

This is an introduction to the aquatic environment for parents and their infants ages 6 - 12 months. Parents are encouraged to develop appropriate expectations for their children's performance in the water. Our goal is to provide the infant with a positive experience in the water alongside their parent or guardian.

Please be advised that all children learn at different rates and are only to be positively reinforced during this class.

Children will become accustomed to being both vertical and horizontal in the water under the direct supervision and participation of their adult guardian. Social interaction, fun with music, and toy interaction are included in these lessons.

Level 2 - age 13 months - 36 months

Children in the 13 - 36 month range will do more independent exploration of the aquatic environment with the assistance of their parent or guardian in the water. Parent and child teams will allow for better socialization and interaction. Our goal is to provide the child with a positive experience in the water as well as grow their confidence and abilities in the aquatic environment.

Please be advised that all children learn at different rates and are only to be positively reinforced during this class.

Children will become accustomed to being both vertical and horizontal in the water under the direct supervision and participation of their adult guardian. Social interaction, fun with music, and toy interaction are included in these lessons.
